

**Test print for multiple pass printing**

An additional factor when multiple pass printing is registration issues caused by the print head returning to the start point to print further passes, and by the material expanding between the print passes. Please print this 1m x 1m file.

A line discipline is suitable if looking at both the corner images, only black is visible from the reverse and no white is visible from the front. If you plan to print larger sheets of material, you should create a similar test print at the maximum sheet size that you intend to print.

**Fine:**  
Black 2.4 mm  
White 2.2 mm  
Design 2.3 mm

**Medium:**  
Black 2.4 mm  
White 2.0 mm  
Design 2.2 mm

**Coarse:**  
Black 2.4 mm  
White 1.8 mm  
Design 2.1 mm
